

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

Claims 1-12. (Canceled)

Claim 13. (Previously Presented) A fungicidal composition comprising synergistically effective amounts of:

(a) a 2-[2-(1-chlorocyclopropyl)-3-(2-chlorophenyl)-2-hydroxypropyl]2,4-dihydro-[1,2,4]-triazole-3-thione of the formula

and

(b) a triazole derivative of the formula

wherein the weight ratio of active compound of the formula (I) to the active compound of the formula (III) is from 1:0.2 to 1:10.

Claim 14. (Previously Presented) The composition of Claim 13 wherein the weight ratio of the active compound of formula (I) to the compound of formula (III) is from 1:0.33 to 1:3.

Claim 15. (Previously Presented) A method for controlling fungi comprising applying the composition according to Claims 13 or 14 to the fungi and/or their habitat.

Claim 16. (Currently Amended) A fungicidal composition comprising synergistically effective amounts of:

(a) a 2-[2-(1-chlorocyclopropyl)-3-(2-chlorophenyl)-2-hydroxypropyl]2,4-dihydro-[1,2,4]-triazole-3-thione of the formula

and

(b) a triazole derivative of the formula

wherein the weight ratio of active compound of the formula (I) to the active compound of the formula (III) is from 1:1 to 1:3 ~~3:4~~.

Claim 17. (Canceled)

Claim 18. (Currently Amended) A method for controlling fungi comprising applying the composition according to Claim[[s]] ~~16 or 17~~ to the fungi and/or their habitat.

Claim 19. (New) The method according to Claim 18 wherein the fungi is a cereal disease.

Claim 20. (New) The method according to Claim 19 wherein the cereal disease is selected from the group consisting of Erysiphe, Puccinia and Fusarium.

Claim 21. (New) The method according to Claim 18 wherein the composition is applied to plant parts at a rate between 10 and 1000 g/ha.

Claim 22. (New) The method according to Claim 18 wherein the composition is applied to soil at a rate between 1 and 5000 g/ha.

Claim 23 (New) A method for controlling fungi comprising applying a fungicidal composition comprising:

(a) a 2-[2-(1-chlorocyclopropyl)-3-(2-chlorophenyl)-2-hydroxypropyl]2,4-dihydro-[1,2,4]-triazole-3-thione of the formula

and

(b) a triazole derivative of the formula

wherein the weight ratio of active compound of the formula (I) to the active compound of the formula (III) is from 1:0.2 to 1:10.

Claim 24. (New) The method according to claim 23 wherein the weight ratio of active compound of the formula (I) to the active compound of the formula (III) is from 1:0.33 to 1:3.

Claim 25. (New) The method according to claim 23 wherein the weight ratio of active compound of the formula (I) to the active compound of the formula (III) is from 1:1 to 1:3.

Claim 26. (New) The method according to Claim 23 wherein the fungi is a cereal disease.

Claim 27. (New) The method according to Claim 26 wherein the cereal disease is selected from the group consisting of Erysiphe, Puccinia and Fusarium.

Claim 28. (New) The method according to Claim 23 wherein the composition is applied to plant parts at a rate between 10 and 1000 g/ha.

Claim 29. (New) The method according to Claim 23 wherein the composition is applied to soil at a rate between 1 and 5000 g/ha.

Claim 30. (New) The method according to Claim 28 wherein the composition is applied to plant parts at a rate from 25g/ha to 1000 g/ha.
